# **KERN BALANCES & TEST SERVICES CATALOGUE 2021**

# School balance KERN EMS

# Entry level model in the low-cost range with large weighing plate

# Features

- Especially suitable for use in schools and universities, for example for biology, chemistry, physics
- Large, shock proof weighing plate made of plastic, with conductive lacquer
- Particularly flat design
- Ergonomically optimised key pad with large keys and a high-contrast LCD display
- Secure and non-slip positioning through rubber feet
- Adjusting program CAL for quick setting of the balance accuracy, external test weights at an additional price, see Test weights
- Draught shield standard for models with weighing plate size ■, weighing space W×D×H 145×145×65 mm
- Suitable for common school LIMS systems

# **Technical data**

- LCD display, digit height 25 mm
- Dimensions of weighing surface,
  ▲ Ø 105 mm
- W×D 175×190 mm, see larger pictureWeighing plate material
- Image: plastic, with conductive lacquerImage: plastic
- Overall dimensions W×D×H
  200×280×63 mm (without draught shield)
- Optional battery operation, 9 V block not included in scope of delivery, operating time up to 40 h
- External mains adapter standard
- Net weight approx. 1,4 kg
- Permissible ambient temperature 5  $^{\circ}\text{C}/35$   $^{\circ}\text{C}$

# Accessories

 Z Stainless steel weighing plate, only for models with weighing plate size 3, KERN EMS-A01

## Internal adjusting: Quick setting up of the balance's accuracy with

# Adjusting program CAL:

For quick setting up of the balance's accuracy. External adjusting weight required

internal adjusting weight (motordriven)

Easy Touch: Suitable for the connection, data transmission and control through PC, tablet or smartphone.

# Memory:

Balance memory capacity, e.g. for article data, weighing data, tare weights, PLU etc.

Alibi memory:

Secure, electronic archiving of weighing results, complying with the 2014/31/EU standard

# Data interface RS-232:

• 6550.• To connect the balance to a printer, PC or RS 232 network

# **RS-485 data interface:**

To connect the balance to a printer, PC or other peripherals. Suitable for data transfer over large distances. Network in bus topology is possible

# USB data interface:

To connect the balance to a printer, PC or other peripherals

# Bluetooth\* data interface:

To transfer data from the balance to a printer, PC or other peripherals

\*

# WiFi data interface:

To transfer data from the balance to a printer, PC or other peripherals

Control outputs (optocoupler, digital I/O): To connect relays, signal lamps, valves, etc.

# Analogue interface:

to connect a suitable peripheral device for analogue processing of the measurements

# Interface for second balance:

For direct connection of a second balance

# Network interface:

For connecting the scale to an Ethernet network

# **KERN – Precision is our business**

To ensure the high precision of your balance KERN offers you the the appropriate test weight in the international OIML error limit classes E1-M3 from 1 mg - 2500 kg. In combination with a DAkkS calibration certificate the best pre-requisite for proper balance calibration.

The KERN DAkkS calibration laboratory today is one of the most modern and bestequipped DAkkS calibration laboratories for balances, test weights and force-measurement in Europe

Thanks to the high level of automation, we can carry out DAkkS calibration of balances, test weights and force-measuring devices 24 hours a day, 7 days a week.

## Range of services:

- · DAkkS calibration of balances with a maximum load of up to 50 t
- · DAkkS calibration of weights in the range of 1 mg 2500 kg · Volume determination and measuring of magnetic susceptibility (magnetic
- characteristics) for test weights · Database supported management of checking equipment and reminder service
- · Calibration of force-measuring devices
- · DAkkS calibration certificates in the following languages DE, EN, FR, IT, ES, NL, PL
- · Conformity evaluation and reverification of balances and test weights
